

## Release Bulletin

### Accu Gold 3 Software & Accu-Gold T3 Firmware

We are pleased to announce the release of **Accu-Gold 3 Software Version 3.34** and **Accu-Gold T3 Firmware 3.8.5**.

These Updates brings significant improvements to the Accu-Gold 3 Software & Accu-Gold T3  
Key updates are listed below

#### New Features

- ✓ **Wi-Fi join functionality**  
The Accu-Gold T3 can now join existing Wi-Fi networks, including mobile hotspots such as your smartphone. This allows you to stay connected to the internet on your PC while performing measurements with the T3—no need to switch networks or compromise connectivity.
- ✓ **Sync “smart machine profiles” between Accu-Gold 3 & Accu-Gold T3**  
Smart machine profiles are now automatically synchronized between Accu-Gold 3 Software and your T3 device—so your setup is always consistent and ready to go.

#### Improved Functionality

- ✓ Improved help: With QR code with link to Radcal tutorials webpage
- ✓ Fasten update process of Accu-Gold T3 with Status
- ✓ Validation after Installation if Profiles were installed successfully
- ✓ Accu-Gold 3 Software shows now the connected device serial
- ✓ Extended measurement length to 300 sec.
- ✓ Minor bugs were fixed.

Kind regards,

Mr. Daniel Bödeker
